Nanotech Appoints Troy Bullock as CFO

VANCOUVER, British Columbia – June 27, 2014 – Nanotech Security Corp. (TSXV: NTS) (OTCQX: NTSFF), is pleased to announce the appointment of Mr. Troy Bullock, CPA, CA, as its new Chief Financial Officer replacing Mr. Brian Causey, CPA, CA, who has served in this role over the last four years and who will remain a valued director of the Company.

Mr. Bullock is a senior finance professional with more than 20 years of international experience who has a strong track record in both public and private companies with public accounting, restructuring and corporate finance duties at KPMG and Deloitte. Mr. Bullock brings more than a decade of senior financial leadership where he has served as CFO at Norsat International Inc., Ascalade Communications Inc., and most recently as CEO at Stormtech Performance Apparel Ltd. He is a veteran of companies characterized by significant growth, international operations and sophisticated commercial transactions. Mr. Bullock's appointment as CFO of the Company is effective immediately.

"I am excited by Nanotech's potential and am looking forward to working with the team to take the Company to the next level," said Mr. Bullock.

Mr. Doug Blakeway, Nanotech CEO, commented on the appointment: "We have been looking for a full time CFO and Troy's experience and skill set are a great fit for us. We wish to thank Brian for his work and professionalism as CFO during our pre-commercial stage."

The Company has granted 300,000 options at the current market price as part of Mr. Bullock's compensation package.

About Nanotech Security

Nanotech Security Corp. has been a leading innovator in the design and commercialization of advanced security products and solutions for a number of years. Nanotech's *KolourOptik*[™] and *Plasmogram*[™] optically variable devices (OVDs) are nanotechnology based product platforms originally inspired by the unique optical properties of the iridescent wings of the Blue Morpho butterfly. Nanotech OVD images produce intense, high definition images that are ideal for brand authentication and for distinguishing

currency, documents, personal identification, consumer electronics, etc. from fakes. Nanotech's *KolourOptik* OVD platform creates unique, easy to authenticate images through interaction of light with nano-sized (billionth of a meter) arrays of surface indentation structures imbedded through algorithms and electron beams into various substrates. These nanostructures create vivid colour images, activated by a simple tilt or rotation, and achieve higher resolutions than the best LED-displays currently available, as well as having optical properties not achievable with holograms.
